ABOUT

OVER 14 YEARS OF EXPERIENCE IN FULLSTACK DEVELOPMENT, TECHNICAL LEADERSHIP, AND SYSTEM ARCHITECTURE.

From early e-commerce platforms to enterprise-scale microservices, I have consistently led technical teams to deliver high-performance applications. I specialize in backend architecture (Node.js, .NET Core), frontend/mobile development (React, React Native), and orchestrating complex deployments across diverse technology stacks.

01

System design for scalable and resilient platforms

02

Backend and integration architecture across .NET, Java, PHP, and Node.js

03

Frontend and mobile experience delivery with React, Vue, and React Native

04

Database optimization, caching, asynchronous processing, and cloud-native operations
